Informed Consent Form

Dear Participant,

8x 4

thank you for your participation in the study.

In this study, you'll be asked to perform certain tasks wearing Microsoft HoloLens and to answer some questions. The whole process will take around 30-60 minutes. You are free to stop, quit the study and retract your data at any time during the study with no further consequences. **Privacy:** Original data obtained from this study will be anonymized and only processed in aggregate. In such form, it might be published in academic journals, presentations or other media, but never in a way that would allow individual identification. One week after the study it might no longer be possible to retract your data from such aggregated analyses.

If you have any questions, please contact Jiongyan Zhang via jiongyan.zhang@tum.de.

☒ I confirm I volunteered to participate in this study.

Pre-task questionnaire

Gender: ☐Male ☒Female ☐Other   Nationality: Greek   Age: 26

Field you are working/studying in: Cartography

This questionnaire consists of several statements about your spatial and navigational abilities, preferences, and experiences. After each statement, you should circle a number to indicate your level of agreement with the statement. Circle "1" if you strongly agree that the statement applies to you, "7" if you strongly disagree, or some number in between if your agreement is intermediate. Circle "4" if you neither agree nor disagree.

1= strongly agree / none, 7 = strongly disagree / a lot of

2. Physical Demand: How physically demanding was the task?
Very Low   Very High

3. Temporal Demand: how hurried and rushed was the pace of the task?

Very Low   Very High

4. Performance: How successful were you in accomplishing what you were asked to do?

Perfect   Failure

5. Effort: How hard did you have to work to accomplish your level of performance?
